

LO: To be able to identify key features of a bar chart.

To understand what a bar chart shows us.

1. This graph shows what children's favourite flavour ice cream is. Label the above graph.
2. How many children like chocolate flavoured ice cream?
3. How many more children like mint chocolate flavour?
4. What is the favourite flavour ice cream?
5. What is the least favourite flavour?
6. How many children like banana flavoured ice cream?
7. How many children like toffee flavoured ice cream?
8. Which flavour has only one more child liking it than vanilla?
9. By adding up all the column totals could we find out how many children there were altogether? Yes or No? Why?
10. Another flavour of ice cream was researched and found that it was not liked as much as chocolate, but it was liked more than toffee and was a multiple of 10. How many children liked this flavour?
